

# ***Ally Plus***

***Encapsulating Carpet Cleaner, Soil Absorbent  
and Upholstery Cleaner***

**Carpet Shampoo ♦ Bonnet Cleaner ♦ Upholstery Cleaner  
Carpet Spot Remover and Dry Vacuum Aid**

## ***The Power of Polymer***

Ally Plus is made with Acri-Sorb 60. A new generation polymer encapsulant that adds an extra dimension to carpet cleaning.

- ♦ Eliminates rapid resoiling caused by detergent residue.
  - ♦ Enhances soil removal during dry vacuuming.
    - ♦ Provides anti-soil properties.
    - ♦ Allows spot cleaning without rinsing.

***Put the power of Ally Plus  
to work for you!***

Manufactured by:

Wayne Concept Manufacturing Co., Inc.

*Serving the maintenance community since 1933*

**Wayne® *Ally Plus***  
***Encapsulating Carpet Cleaner, Soil Absorbent  
and Upholstery Cleaner***

***Lower total cost ...  
extends the cleaning cycle two ways***

Most carpet isn't cleaned until it looks dirty. Generally, we dry vacuum until traffic stains develop and then restore appearance with a bonnet shampoo or extraction cleaning. In short, the longer carpet looks good, the less we have to spend.

Ally Plus extends the cleaning cycle two ways. On initial cleaning, our polymer encapsulant system captures the dirt and the detergent residue in a brittle polymer film that is easily and completely removed by dry vacuuming. This eliminates the accumulations of sticky surfactant residue that accelerates resoiling. Second, the polymer serves to reduce the static attraction that holds dry soil to carpet and increases the amount of soil removed with routine, dry vacuuming. Carpet looks better ... longer ... and costs less to maintain.

***Turns dry vacuuming into dry cleaning***

Daily vacuuming is the foundation of every carpet maintenance program. Unfortunately, dry vacuuming only removes about 70% of the soil ... the rest attaches to the carpet fibres and builds to unsightly traffic patterns. Periodic spray application of diluted Ally Plus will encapsulate the dirt, separate it from the carpet fibre and hold it for removal on the next routine vacuuming. Every pass of the vacuum removes more dirt improving labor efficiency and further extending the cleaning cycle.

***Reduces inventory ... multiple applications***

Ally Plus is the only carpet cleaner most buildings need. It is excellent for deep shampooing dirty carpet with a standard floor machine with a carpet brush. As a bonnet cleaner, Ally Plus cleans fast, dries fast and never builds dirt attracting residue. Manual cleaning of congested areas is a breeze with Ally Plus and a microfibre flat mop. And, routine spot removal is an easy spray, brush and blot no brainer with no rinsing or special equipment required.

***Safe and Easy to use***

Ally Plus is pH neutral and safe for all color fast carpeting. The careful balancing of surfactants for cleaning and polymer encapsulants to absorb the surfactant and residue makes it almost impossible to over-use Ally Plus. (We like to say it's self-absorbed like a blonde pop vocalist.) Encapsulation also eliminates the necessity for rinsing and the potential for damage caused by excessive moisture.

**Seeing  
is  
believing ...**

**Floor Machine  
Cleaning**

Ally Plus deep cleans without overwetting.  
No special equipment needed.

**Bonnet Cleaning**

Carpet can be bonnet cleaned on a regular basis without detergent build-up. Regular use actually slows resoiling.

**Small Area  
Cleaning**

Congested areas clean easily with flat mop and Ally Plus.

**Dry Vacuum  
Cleaning**

Periodic spray with diluted Ally Plus increases vacuum efficiency and reduces resoiling.

**Carpet Spotting**

Ally Plus is great for routine spot removal. Just spray, agitate and let dry. No rinsing needed.

Wayne®

# **Ally Plus**

**Saves time & Labor ....** Scrub in and let dry. Absorbent formula eliminates rinsing and extracting.

**Eliminates tacky residue ....** Absorbs oily film and detergent residues that cause rapid resoiling and unsightly traffic lanes. Carpet stays cleaner longer.

**Low moisture ....** Carpets dry faster with less down time. Eliminates problems caused by over wetting.

**Versatile application ....** No special equipment required. May be used with bonnet systems, rotary shampoo equipment, foam generators or manual application with flat mop or brush.

**Excellent touch up cleaner ....** Great for spot cleaning of congested areas or traffic lanes.

**Economical ....** One gallon of Ally yields 32-40 gallons of effective cleaning solution. Enough to bonnet clean over 10,000 square feet.

## **How it works**

<b>Ingredients</b>	<b>Description</b>	<b>Function</b>
Glycol Ethers	Water soluble solvents.	Breaks oily film that holds dirt to carpet fibre. Speeds drying.
Surfactants	Wetting agents - Penetrants.	Solubilizes oily film thinned by solvents. Suspends soils in water.
Polymers	Acrylic/Copolymer emulsions. Made to dry to a brittle film that shatters under abrasion.	Improves detergency of surfactants. Eliminates tacky residue by absorbing surfactants. Reduces resoiling and enhances soil removal during vacuuming.
