

Con Coil Plus

Condenser Coil Cleaner & Deoxidizer

Saves electricity ...

A dirty air conditioner can easily consume 25-30% more electricity than a clean one. Even a small, 3 ton unit can burn through an extra \$200⁰⁰ or more per season. Bigger units can waste thousands. A little preventive maintenance is an excellent investment.

Reduces service expense ...

Efficiently operating ACs run less and sustain less wear. Less expensive parts to replace and fewer service calls.

Less aggravation ...

Air conditioners always break down when you need them most. Less wear means fewer break downs and a more pleasant summer.

Easy and economical ...

All that is required is a pump-up sprayer, the right cleaner and a little time. A 3 ton unit can be cleaned with about 48 ounces of Con Coil Plus (3 units per gallon) in less than 20 minutes.

Con Coil Plus ... The Right Product

Con Coil Plus is a professional strength cleaner and deoxidizer made especially for the maintenance of AC condenser coils. Upon application Con Coil Plus reacts with white rust corrosion to generate a dense foam that expands and penetrates through the fins and coils. In minutes dirt, debris and corrosion lift into the foam for easy removal with a simple, clear water rinse.

Con Coil Plus contains no dangerous hydrofluoric acid and is safe to handle and use with minimal personal protection.

Wayne® **Con Coil Plus**

Seeing is believing!!

Standard 3½ ton condenser coil. Note debris in fins that can restrict air flow and add hundreds to power costs in a season.

Con Coil applies in minutes. Foaming action removes corrosion and floats dirt and debris from the fins and coils.

Loosened materials rinse easily with a standard garden hose.

Cleaned condenser coil unit. Air passes freely, efficiency is improved. And the savings are automatic.
