

Terrazone

Terrazzo Seal and Finish

Protects

Wayne Terrazone serves as both a penetrating seal that fills the pores to resist chemical damage and stains and a wear coat finish that produces a lustrous shine that stands up to heavy traffic.

Fewer Coats and Less Labor

Our Terrazone is built to a full 22% working solids level50% higher than most competitive products. Three coats of Wayne Terrazone provides as much protection and gloss as five coats of most sealers. That works out to a provable 40% reduction in time, labor and material costs.

Easy to Apply and Maintain

Wayne Terrazone applies easily with any conventional applicator. Special leveling agents allow the protective film to form evenly and dry to a full gloss without the mottled appearance often produced by terrazzo seals. When repairs are necessary, Wayne Terrazone responds easily to polishing with standard low speed or high speed burnishers.

Terrazone

Terrazzo Seal and Finish

Directions For Use Initial Application

1. Strip existing seal or finish using Wayne Red Blitz, Wayne The Hammer or other heavy duty stripper.
2. Rinse thoroughly and allow to dry.
3. Apply Terrazone in a medium, uniform coat with a clean wax and seal flat mop applicator or wax and seal mop.
4. Apply subsequent coats only when floor is dry and tack free. Usually 60 minutes depending on humidity.
5. For best results, three or four coats are suggested to build gloss and provide maximum durability.

Maintenance

Dust mop daily with treated mop or disposable duster. Damp mop as needed using Wayne Haze Away or Wayne Waste Not NRFC.

Repair

Clean floor with Wayne Auto Prep. Burnish with high or low speed polisher.

Recoat

Scrub floor with Wayne Skim, rinse and apply one to two coats of Terrazone to traffic areas only.
