

Wayne® ADD Acidulated Detergent Deodorant

For Use On

Toilets, Urinals, Shower Walls, Stainless Steel, Ceramic and Glass Surfaces

Description

Wayne ADD is a low acid bathroom cleaner that cleans, descales and deodorizes and is designed to remove hard water deposits, lime, rust, calcium, soap scum and stains from acid resistant surfaces.

Directions

Read entire label before using. Do **not** use on marble, aluminum or terrazzo. Test on an inconspicuous area to determine suitability for use.

Toilet Bowls and Urinals: Apply undiluted product with bowl swab beginning under flush rim and working down toward the trap. Rinse by flushing.

Ceramic and Plastic Tiles: To remove heavy accumulations of rust, soap film or mineral deposits: Apply undiluted product with a sponge pad, scrub with a grout brush or soft abrasive pad. Rinse thoroughly with clear water.

Routine maintenance of Ceramic Tile, Shower Walls, Stainless Steel Fountains and Other Acid Resistant Surfaces: Dilute with 3 parts water. Apply with a soft cloth or swab. After cleaning, rinse immediately with water.

Specifications

Detergency Excellent
Rust Removal Excellent
Rinsability Complete
Abrasives None
Odor Almond/Cherry
Color Blue Emulsion
Foam High
Biodegradable Completely
Weight per gallon . . . 8.67 lbs/gal.

Base Hydrochloric acid
Acid Content 9.0 ± .5%
Inhibited Yes
Fumes Low
pH5-1.0
Flash Point None
Stability 2 Years
Freeze/Thaw Stability Do not freeze
