

Wayne®

LLD

Liquid Laundry Detergent

Complete "one shot" detergent

Wayne LLD is a single component, premium quality laundry detergent formulated to work on a broad range of soils, water conditions and fabrics. Incorporated in its formula are high concentrations of water softeners, wetting agents, mild alkaline builders, oil and grease dispersants, soil anti-redeposition agents, fabric conditioners and deodorants...in short, everything necessary for superior cleaning and finish.

Fabric safe

Most commercial laundry systems boost their cleaning effectiveness with harsh alkalis that attack and weaken fibers with each laundering. LLD achieves its remarkable effectiveness by the synergistic interaction of effective, but relatively mild ingredients. LLD retains its cleaning power at low water temperatures making it ideal for washing items treated with heat sensitive finishes, like soil retardants, water repellents or permanent press. LLD is safe to use on natural or synthetic fibers without the danger of chemical burns or accelerated loss of specialty finishes.

Low use cost

LLD is so concentrated that as little as 1/4 cup per washload is all that's required for most jobs. A single gallon of LLD can replace as much as 30 pounds of laundry powder.

Professional results

LLD delivers a superior finish on all washable fabrics. Excellent soil suspension properties eliminate greying and color distortion caused by soil washing back into fabric. LLD rinses freely and quickly leaving laundered items soft and natural without alkaline residue or detergent film. A light pleasant fragrance completes the job by eliminating musty odors and imparting a fresh clean scent.

Serving the maintenance community for over 60 years

Wayne®

LLD

Liquid Laundry Detergent

ADVANTAGES

- Convenient "one shot" application
- Excellent hard water tolerance
- Leaves no residue in laundry
- Preserves fabric finish
- Safe on natural or synthetic fibers
- Economical use cost
- Works at low or high temperatures
- Deodorizes

DIRECTIONS

Pretreatment of heavily soiled articles:

1. Pre-soak problem articles for one or two hours in a 10-1 dilution of LLD prior to washing.
2. Where pre-soaking isn't practical, apply a little LLD directly to the affected area and proceed with washing.

Dilution: Manual Application

Top loading machines—use 1/4 to 1/2 cup depending on soil load

Front loading machines—use 1/8 to 1/4 cup depending on soil load

Dilution: Automatic Dispensers - Commercial Washers

Light Soil—2 oz. per 20 pounds dry weight

Medium Soil—4 oz. per 20 pounds dry weight

Heavy Soil—6 oz. per 20 pounds dry weight

CHEMICAL DESCRIPTION

A blue, semi-viscous liquid with a pleasant floral fragrance. Chemically, a blend of water conditioners, selected phosphates, anionic and nonionic surfactants, fabric conditioners, soil anti-redeposition agents and essential oils.

PRODUCT SPECIFICATIONS

Specific gravity 1.091
Density 9.083# per gal.
pH concentration 8.6 ± .5
pH 1% solution 8.0 ± .5
Flash point none
Fire point none
Free caustic none
Hard water tolerance excellent
Rinsability complete
Solubility in water infinite
Foaming moderate

PRODUCT SAFETY DATA

CAUTION: Eye irritant. Contains nonionic and anionic surfactants and alkaline builders. Prolonged contact can be defatting to skin. Do not take internally.

FIRST AID: Eyes: Flush with plenty of water. Seek medical attention if irritation persists.

Skin: Rinse with clear water.

KEEP OUT OF REACH OF CHILDREN.
