

# Lil' Squirt

**Really big water dilutable deodorant**

## Neutralizes and Freshens

Lil'Squirt is formulated with ODX-200 , a remarkable, new technology developed for commercial odor elimination in the fire restoration industry. It works by chemically binding with odor causing substances, changing their molecular structure and rendering them undetectable. Odors are eliminated in the air or at their source with a single application.

## Multipurpose

Lil'Squirt works on almost any odor problems. When a mal-odor source is easily identified, like soiled linens or bed pans, a light mist of the full strength concentrate applied directly to and around the problem will do the trick in seconds. For bigger problems like garbage cans, dumpsters or waste chutes, a diluted solution applied as a wet spray is the answer. For routine housekeeping chores an ounce or two in the mop water, scrubber or extractor tank will eliminate restroom odors, freshen offices and meeting rooms and eliminate carpet odors. And, for use as a general air freshener for temporary odors a 20-1 dilution in a trigger sprayer is an effective and economical replacement for expensive aerosol sprays.

## Appealing fragrances

Quality perfumes contribute significant benefits to deodorant products. They provide immediate odor masking to make conditions more pleasant for workers while the chemical neutralizers do their job. They leave a pleasant aroma in treated areas. And, most important, they serve as marking agents to prevent over use and waste. Lil'Squirt is available in several distinctive fragrances to accommodate any preference

## Double concentrated for economy

Lil'Squirt is a professional strength concentrate formulated to be diluted with water for maximum economy. Used as directed, a single gallon will yield as much usable room freshener spray as 12-16 cases of aerosol spray. As a shampoo additive, a one ounce per gallon dilution will treat 1,000 square feet of carpet per gallon. In short, high concentration and versatile applications let you stock fewer products at a lower use cost when you select Lil'Squirt for your deodorant needs.

**A lil'squirt or a spray takes odors away!**
