

Daily Double II

Disinfectant Detergent Deodorant

Hospital Grade Disinfectant

- ✓ Effective on MRSA & VISA Staphylococcus Aureus
- ✓ Viricidal against Hepatitis B and C, HIV-1
- ✓ Fungicidal against athlete's Foot Fungus
- ✓ Mildew static on non-porous surfaces

At end use dilution of one-ounce concentrate per gallon of water (128-1) Daily Double II yields a potent 700 ppm active quaternary germicide solution that is over 30% more concentrated than many older registrations and meets current EPA standards for use even in critical hospital areas. It is bactericidal against a broad spectrum of gram negative and gram-positive bacteria, viricidal and mildew static. Daily Double is fungicidal against trichophyton mentagrophytes, the athlete's foot fungus transmitted by contact in public shower and locker areas.

Effective All Surface Cleaner

- ✓ Outstanding performance on hard, grouted flooring
- ✓ Safe for use on polished floors

Neutral detergents are fine for routine maintenance of smooth, highly polished floors, but high soil loads in public restrooms, locker rooms and shower areas require a more powerful solution. Hard floors like ceramic and quarry tile have surface irregularities and porous grout lines that allow soils and minerals from mop water to penetrate and accumulate causing unsightly discoloration and slippery footing. Daily Double II contains high concentrations of chelating agents to break up and disperse mineral and soap deposits and mild alkaline builders to attack oily soils and buffer against detergent fade. With a pH of $10 \pm .5$ in dilution, Daily Double II is strong enough to deliver outstanding detergency and safe enough for use on any surface not affected by water.... even polished floors.

Economical and Versatile

- ✓ End use cost below 18¢ gallon
- ✓ Low cost, non-acid bowl cleaner
- ✓ Reduces inventory

Daily Double II is E.P.A. registered for use as a disinfect cleaner at one ounce per gallon dilution. It is suggested for use on resilient or hard flooring, painted and enameled surfaces, stainless steel, Fiberglas, plastic and porcelain fixtures. Under medium to soft water conditions it is a safe and economical, non-acid bowl and urinal disinfectant and deodorant. It is ideal for daily maintenance between applications of acid-based products.

Product #:

J11WDD21

J16CLDD4 (Closed Loop)

Pack: Cs/4-1 gallon

Pack: Cs/4-1 gallon

Manufactured by:

Wayne Concept Manufacturing Co., Inc.
Fort Wayne, IN 46825 260-482-8615

Wayne® Daily Double II Disinfectant, Detergent, Deodorant

Efficacy Data: Bacterial

E.P.A. Registration #: 10324-105-49058

Daily Double II has been tested and approved to exhibit bactericidal activity against the following organisms at a dilution of 128-1 (1 ounce per gallon) in the presence of 5% blood serum at a 10 minutes exposure.

Corynebacterium ammonia genes	Enterobacter aerogenes	Enterococcus faecalis
Escherichia coli	Klebsiella pneumoniae	Listeria monocytogenes
Salmonella typhi (community associated Methicillin resistant)	Shigella dysenteriae (Vancomycin Intermediate resistant)	Staphylococcus aureus (Staphylococcus aureus Methicillin resistant)

Efficacy Data: Viricidal

Daily Double II has been tested and approved to exhibit viricidal activity against the following virus at a dilution of 128-1 (1 oz. per gallon) in the presence of 5% blood serum at a 10-minute exposure.

Human Coronavirus	HIV-1 (Aids Virus)	Influenza A2/Japan Virus
-------------------	--------------------	--------------------------

Efficacy Date: Mildew Fungus

Daily Double II has been tested and approved as a fungistatic agent against the following organism at a dilution of 128-1 (1 oz. per gallon) on hard, nonporous surfaces.

Efficacy Data: Athletes Foot Fungus

Daily Double II has been tested and approved as a fungicidal agent against the following organism at a dilution of 128-1 (1 oz. per gallon) in the presence of 5% blood serum on hard nonporous surfaces.
