

Haze Away

One Step Cleaner & Film Remover

Removes ice melt residue ... leaves the shine

- ☑ **Removes ice melt residue and hard water scum.**
- ☑ **Premium quality mop detergent for all finished floors.**
- ☑ **Highly concentrated ... 1 gallon makes 128 gallons!**

Haze Away is a pH controlled, free rinsing floor cleaner, specially designed for daily cleaning of high traffic areas. At 1 ounce per gallon, our top of the line mop detergent is built to quickly penetrate dirt without causing harm to highly polished floors. Unfinished stone floors cleaned with Wayne Haze Away retain their natural beauty free of mineral deposits and dulling film. It is ideal for use on LVT and vinyl, as well as terrazzo, quarry tile, slate, ceramic and sealed wood or concrete.

The dark clouds of winter bring snow, sleet and ice slicked sidewalks that present a real safety hazard. Chemical ice melters solve the safety problems, but can cause one of winter's most challenging problems - tracked in ice melt residues. That hazy white film is not only unsightly and difficult to remove, it can attack your beautifully finished floors causing accelerated wear, traffic patterns and extensive scrubbing and refinishing. Regular use, at 3 ounces per gallon, eliminates ice melt scum and leaves floors shiny, clean and film free. Floors look better and last longer.

Tracked in ice melt residue leaves walk-off matting an unsightly mess. An additional benefit of Haze Away is its effectiveness as a pre-conditioner for use on industrial carpet matting. It easily removes the discoloration left by ice melt residue. Include Haze Away in your winter program and make those dark days a little sunnier.

- ❄ Non-streak formula
- ❄ Removes dulling haze
- ❄ Leaves the shine
- ❄ Eliminates soap film and hard water marks
- ❄ Neutralizes corrosive salts
- ❄ Highly concentrated
- ❄ Saves time and labor
- ❄ Safe on LVT
